SPECIAL ABILITIES

Object: Melee attacks will automatically hit, a PRC roll is still needed to damage. Shoot attacks are taken as normal.

Searchable: A model within 1/2" may spend 1 ACT to search this token. Use the Found Itemz Chart (found in the main rules) to determine what is found, unless a 10 is rolled (see Booby Trap SpAb below). After the search is complete Redeploy this token using the rules for Strayz.

Booby Trap: If a 10 is rolled while searching this token and the Minigun is not yet deployed, the Minigun is found (replace this token with the Minigun token).

If a 10 is rolled while searching this token and the Minigun is deployed, then this token Detonates (see Detonate SpAb below)

Redeploy: Use the Strayz rule to deploy this token on the playing area.

Detonate: As soon as the last BP is marked for this model, all models within 2" of this model are hit with a PRC 6 Attack. Redeploy this token using the rules for Strayz.

WEAPONZ

Auto Minigun: This weapon takes its Turn at the end of every Round before Initiative is rolled. On its Turn it will take a Shoot Action against *every* model in its RNG (including those within Melee RNG).
